Identification
Records identified from databases (n = 5829)
• PubMed 4071
• SemanticScholar 1758
Records after deduplication (n = 5064)
Duplicates removed: 765
Screening
Records screened — title/abstract (n = 5035)
Records passing ALL inclusion criteria (n = 353)
Inclusion criteria (all four required):
[+] I1 DSA/fluoroscopy sequence modality -> 661
[+] I2 Addresses a computational processing task -> 2547
[+] I3 Method described -> 2884
[+] I4 Quantitative evaluation reported -> 3346
Records excluded (n = 144)
Exclusion criteria applied:
[-] E1 Wrong modality (CT/MRI/US/X-ray only) -> 114
[-] E2 Single static frame (no temporal component) -> 29
[-] E3 No original computational method (review/commentary) -> 0
[-] E4 Abstract-only or poster (no full methods) -> 0
[-] E5 Non-English language -> 1
Reports sought for full-text retrieval (n = 209)
Reports not retrieved (n = 15)
Reports assessed for eligibility (n = 194)
Reports excluded at full-text (n = 0)
(did not meet full-text eligibility criteria)
Included
Studies included in systematic review (n = 194)
